

Los Angeles Parks Foundation

Los Angeles PARK FORESTS

The Los Angeles Parks Foundation is launching an initiative to create small “forests” in city parks throughout L.A. to offset our carbon footprint, cool surface air temperatures and educate the public about climate change. Sponsors will have the opportunity to plant groupings of climate-appropriate trees for all Angelenos to enjoy. In partnership with Mayor Eric Garcetti, we hope to plant thousands of new trees citywide in the coming years

The mission of the Los Angeles Parks Foundation is to enhance, expand, preserve and promote public recreation, parks and open space for the people of Los Angeles.

2650 N. Commonwealth Avenue, Los Angeles, California 90027

PROJECT GOALS

FIGHTING CLIMATE CHANGE

by building an urban ecosystem to capture carbon output

GROWING URBAN CANOPY

by providing new shade coverage in high-need neighborhoods

CREATING WILDLIFE HABITATS

by establishing natural environments to benefit local fauna

RESTORING FIRE DAMAGE

by re-planting trees in communities affected by recent wildfires

SPONSORSHIP PACKAGE INCLUDES

Design, planting and long-term care of site-specific installations & educational outreach

Plaque commemorating sponsor

Forest size & elements tailored to needs/conditions of park
